It's exactly what it looks like. An isometric arcade game where you play a lumbering mech sprinting across the city to deliver pizzas to various targets, while collecting time bonuses and battling an ever increasing horde of evil robots.

Several different maps on which to play of increasing difficulty and various gimmicks, from a pleasant suburb to cities of different shapes to archipelagos to a volcanic crater. Those too focused on Crazy Taxi might find the small time bonuses for deliveries to be insulting, but the game is balanced a bit more around collecting time and cash and special items in the field as well. A story campaign accompanies partly to act as a tutorial for the arcade score-chasing modes but manages to give its own value; there the time limits are generally quite generous.

The story offers a variety of different objectives on each map and a decent enough story. It is seldom funny but surprisingly charming, your team is given a decent amount of character without wasting your time so everyone comes across as memorable; heck, I downright liked the crew by the end in almost the same way I liked the old Star Fox squad. Everyone you meet is a parody of some sort, but the game doesn't dwell TOO hard on references so it ends up charming rather than like a bad Big Bang Theory episode. I enjoyed the story.

The actual arcade gameplay is simple enough, but decently fun. Your mech has a sprint toggle, which gives it speed, but also means you must contend with momentum. Jumps, dodges, air attacks, ground attacks, a small selection of super moves to pick from... with sprint toggling your attacks from momentum focused to area focused... There is enough to the game to chew on, and each enemy tends to be countered by one or two of your moves, but the impacts and execution animations of some of the bigger enemies are pretty terrible, but that is forgiveable. You do not feel like a giant robot fighting other giant robots at all, but you do feel like a giant robot who really has to be somewhere and is swatting enemies out of the way as quickly as possible to get back to running. Yet despite all this, the platforming and movement is largely precise. The game asks a lot of precision jumping in later levels and, apart from the occasional geometry glitch, it's surprisingly easy to land jumps on the islands the game asks you to while keeping momentum.

Pizza Titan isn't great... but it is quite good. The arcade score chasing isn't at the level of an old-school Japanese game, but it's still clearly made by gamers and for gamers, and definitely scratches the one-more-run score chase itch. It's miles ahead of several old school games Yakuza has had me play.... And the campaign is a nice bonus, to the point where you probably wouldn't waste your money just doing the campaign. But you might find you like it well enough to come back to the real meat of score chasing. It probably won't replace Outrun 2006 or RE5 Mercenaries for you, but I think Pizza Titan is definitely worth a look, if for nothing else than that nobody has done anything quite like this before.. this game crashes on start up, playstation home was better then this crap. She beautiful! Super awesome!. The game is actually nicely made, the puzzles being not too hard and not too easy either, story segments nicely told for a game of this genre.. and yet I can't recommend it.

This game is filled with bugs left and right (like many comments/reviews before this one showed) and I myself also managed to run into a bug, in which I placed part of a key into a machine which I still needed to use elsewhere but had no chance of ever picking up again-- hence, me being unable to continue playing.

Pretty game, but sadly I can't recommend a buggy game.. Another tedious mystery in this boring series of non-games. There's no intrigue, no atmosphere, and absolutely no reason to "play". The acting is horrendous and there is zero actual gameplay. Why does it end with you going before a judge? Holmes was a "CONSULTING" detective. It's in the title for heaven's sake! The information would be passed onto Lestrade or another representative of Scotland Yard and it would be them going to court.

There are small improvements over the abysmal Mega CD version but the absence of trophies/Vachievements and trading cards means that there will be nothing to drag you back to this after you suffer through it the first time.

AVOID!. I knew from the ratings this game was badly received and still decided to try, because I hope it was similar to the first dungeon siege game which I loved. I'm not sure why dungeon siege was so awesome (there virtually was no plot after all, it was supremely linear hack and slash and yet.... fond memories). The graphics aren't that fantastic, controls are iffy, AI is stupid, plot is, erhm, and the dialogues are horrible. If you REALLY have nothing better to do with your time, then by all means... Great idea for a game, but need some improvements to get it to where it need to be to make it more realitic, and user friendly. I dont

recommend this game at this time, but may in the future if updated correctly.

[The age of the title does it little favors but there is still enough charm left in it's simple tentacle based functionality to make the game worth diving into.. From the screenshots, you can tell 4x4 Dream Race is not the most modern game. A game has managed to get onto steam that looks like the N64 version of Hotwheels Racing, but with worse graphics. While this game may just seem like babbies first homemade game, googling 4x4 Dream Race's past brings up something much more sinister.](#)

[The first few results for this game brings up free downloads for it. So you might be thinking, "Wow MFC Recruiter John, so it's just a free game dumped on Steam as a cash grab?". Well friend, it gets even worse.](#)

[This is no ordinary quick free game made by new devs, this title was made to spread adware. When you google this title and it only shows free donwnloads as information for it, you'll see that every single website to download from makes you install their "downloader" under the guise of "4x4 dream racing.exe" or a similar named exe.](#)

[From a known website: "4x4 Dream Race is a video game distributed through the INSERTADWAREFREEGAMEWEBSITEHERE'S installer. This installer will also modify the user's web browser home pages and default search provider to SAMEWEBSITE'S in Internet Explorer, Firefox and Chrome. While the game itself is valid, uninstalling it will not restore the web settings."](#)

[So you have to wonder, how does stuff like this past through the filter? Is there even a filter?. i liked the generic names such as 'Catz' but the music really made me want to die.](#)

[10V10 cat girl vampire power activate!. You get your moneys worth. A small simple annoying pixel mess. This is a very easy and short maze game. A bit minimalist, but fun and worth the price.. I bought this game for to support of the potential of game. \(1.04TL ~ 0.29\\$\)](#)

[I hope developers improve the game, i don't expect from the game to be like NFS or Dirt series but we should able to still play. At least, it should be more realistic physics.](#)

[Note for the developers: I know your first goal is realistic physics and graphics but after this goal, you should improve the xbox360 controller settings i think. \(And you can change the intro little bit, lel\)](#)

[Thanks and good luck!. Well,that didn't take long.Fantastic boot hunt simulator.If ya die ya start all over.I didn't like it.Nice atmosphere though.Can't recommend.. I am loving this game so far, the art, the humor, the game play...only 9 mins but I don't wanna play more with my hubby appreciating it! I will give a more detailed review after more hours of game play.](#)
